EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

On 15 December 2010, a proposed amendment in condition for allowance was discussed with Ms. Susan T. Evans, Applicants' attorney, in a telephone interview. Authorization for this examiner's amendment was given in a telephone interview with Ms. Susan T. Evans on 15 December 2010.

The application has been amended as follows:

- Claims 4, 7 and 224 have been amended, as listed below.
- Claim 2 has been cancelled, as listed below.
- Note: For those claims that are neither amended nor canceled as indicated in this Examiner's Amendment, see the amendment filed on 22 November 2010.

2. (Cancelled)

4. (Currently Amended) The modified-glycosaminoglycan of claim 225, wherein "GAG-O-" represents the ~~residue of~~ substituted hydroxyl group that is a primary C-6

Art Unit: 1623

hydroxyl group contained within an N-acetyl-glucosamine residue present in the hyaluronan.

7. (Currently Amended) The modified-glycosaminoglycan of claim 224, wherein “GAG-O-” represents the ~~residue of a~~ substituted hydroxyl group that is a primary C-6 hydroxyl group contained within a non-uronic acid sugar component of a repeating disaccharide of the glycosaminoglycan.

224. (Currently Amended) A modified glycosaminoglycan corresponding to the structure:

wherein

“GAG” is a glycosaminoglycan selected from the group consisting of chondroitin, chondroitin sulfate, dermatan, dermatan sulfate, heparin, heparan sulfate, and hyaluronan, wherein the GAG possessing possesses a plurality of hydroxyl groups,

“GAG-O” represents a ~~residue of a~~ substituted hydroxyl group on the glycosaminoglycan,

n is 2 or 3, and

0.1% to 40% of the glycosaminoglycan’s primary hydroxyl groups are substituted with -CH₂C(O)NH-NH-C(O)(CH₂)_n-SH.

DETAILED ACTION

Applicants' Amendment and Remarks filed on 22 November 2010, in which claims 1, 3, 6, 8-50, 53-199, 201-223, 227, 228, 231-233, 238, 241, 245 and 246 were cancelled, and claims 2, 4, 5, 7, 51, 52, 200, 224, 230, 236, 239, 242 and 244 were amended to change the breadth and scope of the claims, is acknowledged.

Claims 4, 5, 7, 51, 52, 200, 224-226, 229, 230, 234-237, 239, 240 and 242-244 are pending in the instant application and are found to be allowable.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instantly claimed compounds and compositions are not seen to be taught or fairly suggested in the prior art, as discussed below.

Applicants' amendment and arguments, filed 22 November 2010, with respect to the rejection of claim 236 made under 35 USC § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, have been fully considered and are persuasive as the claim has been amended to clearly indicate what is meant by gelatin-DTPH. Additionally, the structure of gelatin-DTPH is shown in Figure 8 of the instant application, and a journal article publication by Mironov *et al.* (p. 2056, column 2; p.

2057, Figure 2; PTO-892, Ref. U) clearly supports gelatin-DTPH to be the abbreviated form of the full chemical name recited in claim 236.

Applicants' amendment and arguments, filed 22 November 2010, with respect to the rejection of claims 1-10, 24, 25, 51-53, 200, 227, 228, 239, 240 and 242-244 made under 35 USC § 112, first paragraph, as failing to comply with the written description requirement, have been fully considered and are persuasive because the claims have been cancelled and/or the limitation that was deemed to insert new matter into the claims has been deleted from the claims.

Applicants' amendment and arguments, filed 22 November 2010, and the Examiner's amendment above, with respect to the rejection of claims 1, 7-10, 24, 25, 53, 200, 227, 228, 239, 240 and 242-244 made under 35 USC § 103(a) as being unpatentable over PG Pub No. US 2003/0087877 A1 to Calias *et al.*, in view of U.S. Patent No. 5,874,417 to Prestwich *et al.*, have been fully considered and are persuasive. Claims 1, 8-10, 24, 25, 53, 227 and 228 have been cancelled. Claims 7, 200, 239, 240 and 242-244 have been amended to be dependent from allowable claim 224. These rejections have been withdrawn.

In view of the Examiner's amendment above, the instantly claimed modified glycosaminoglycan corresponding to the structure as recited in claim 224, and compositions comprising the modified glycosaminoglycan as recited in claim 224, is non-obvious over the teachings of the prior art. Although the prior art discloses conjugation of hydrazide linkers to glycosaminoglycans such as hyaluronic acid, one of

Art Unit: 1623

ordinary skill in the art would have no motivation to further insert a methylene group between the hydrazide linker and the functional group on GAG, particularly since the prior art teaches that the reactive moieties are the carboxylic acid residue present on hyaluronic acid (or other GAG) with the amine moiety present on a dihydrazide structure.

In view of the cancellation of claims 1-3, 6, 8-50, 53-199, 201-223, 227, 228, 231-233, 238, 241, 245 and 246, all rejections made with respect to claims 1-3, 6, 8-50, 53-199, 201-223, 227, 228, 231-233, 238, 241, 245 and 246 in the previous Office Actions are withdrawn.

The modified glycosaminoglycan corresponding to the structure as recited in instant claim 224, and compositions comprising the modified glycosaminoglycan as recited in claim 224, are disclosed in the instant Specification. For example, support for the claimed modified glycosaminoglycan corresponding to the structure as recited in instant claim 224 can be found on p. 46-47 of the Specification as filed, and the original claims, and support for the claimed compositions can be found on p. 51 of the Specification as filed, and the original claims. Examples for the synthesis of the modified glycosaminoglycan and their use for supporting the growth of cells is further disclosed. Hence, the instantly claimed modified glycosaminoglycan corresponding to the structure as recited in instant claim 224, and compositions comprising the modified

Art Unit: 1623

glycosaminoglycan as recited in claim 224, are enabled and have sufficient written description in the Specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SCARLETT GOON whose telephone number is 571-270-5241. The examiner can normally be reached on Mon - Thu 7:00 am - 4 pm and every other Fri 7:00 am - 12 pm.
